

USER MANUAL

Hariknows Web App

This printable manual documents the current helpdesk, dashboard, and registrar account flows in HariKnows. It is designed to be exported for direct use and is safe to print from a markdown preview.

*Made for scholars,
by scholars*

Purpose

HariKnows provides registrar guidance, student request tracking, and account management for the Office of the University Registrar. The system separates guest guidance from account-aware student tools and registrar staff actions.

User Roles

Guest User

Guests can ask general registrar questions and read published FAQs and policy guidance. They do not have access does not include account-specific records, request history, or credential actions.

University Student

University students can view their profile, monitor their transaction requests, and change their own password. They can also ask account-aware questions tied to verified student data.

Registrar Staff

Registrar staff can search student accounts, overwrite credentials for an existing student number, import CSV files, and maintain FAQ/context content for the helpdesk.

Getting Started

Guest User

1. Open HariKnows in the browser.
2. Use the chatbot for general registrar questions.
3. Read public FAQs and policy guidance.

University Student

1. Open HariKnows and Sign in with the official student number and password.
2. Open the dashboard to view the profile card.
3. Review your transaction request history and status updates.
4. Open the account page to change your password.
5. Ask Hari Chatbot about documents, graduation, and office routing.

Registrar Staff

1. Open the registrar admin interface.
2. Search for the student number you want to update.
3. Can overwrite the student number and password.
4. Upload an ICTO CSV file for batch credential updates.
5. Upload FAQ/context CSV files when registrar guidance changes.
6. Review the live account list and tables for validation.

Student Account Features

Hari Chatbot

Hari is your primary AI-powered registrar helpdesk assistant, designed to answer questions about enrollment, document requests, and processing statuses.

Chatting with Hari

1. Navigate to the Hari page from your sidebar.
2. Locate the message composer at the bottom of the screen.
3. Type your question into the "Ask Hari..." text field.
4. Press the Send icon (or hit Enter) to submit your query.
5. Hari will generate a response.

Transactions History Page

The Transactions page allows you to track the real-time status of your document requests from the registrar.

Viewing and Filtering Requests

1. Navigate to the Transactions page.
2. Use the tabs at the top of the page to filter requests by their specific status.
3. To find a specific document, click on the Search bar and type in the document name, reference code, or status.

Tracking Progress

1. Locate the specific document request you want to track from the list.
2. Click on the document card to open the Transaction Details Modal.
3. This visual timeline will show you exactly where your document is in the pipeline along with timestamps for completed steps.

FAQs Page

The FAQs page provides quick, searchable answers to common registrar questions, automatically tailored to your specific college.

Searching and Viewing FAQs

1. To browse, scroll through the list of questions.
2. Click on a question (or the + icon) to expand the card and read the answer.
3. To hide the answer, click the question again (or the - icon).
4. To find a specific topic quickly, type your keywords into the search bar.
5. If your search yields no results, you can click the **Talk with Hari!** link to ask the AI assistant directly.

4. To find a specific topic quickly, type your keywords into the search bar.
5. If your search yields no results, you can click the **Talk with Hari!** link to ask the AI assistant directly.

Recent Chats Page

This page acts as your conversation archive, allowing you to resume past interactions with Hari.

Resuming a Past Conversation

1. Browse your chat history. Each entry displays a preview of the conversation, how long ago it occurred, and the number of messages exchanged.
2. Click on any chat card to reopen that specific conversation inside the Hari Chatbot interface.

Deleting a Saved Chat

1. Hover over the chat you wish to remove.
2. Click the **Trash** icon on the right side of the chat card.
3. A confirmation modal will appear. Click **Delete** to permanently remove the chat history, or **Cancel** to keep it.

Account Page

The Account Settings page displays your official profile details as securely pulled from the system database.

Viewing Personal Information

1. Navigate to the Account page.
2. Review the Personal Information section.

The screenshot displays the 'Personal Information' section of the account page. At the top, there is a profile card with a circular placeholder for a profile picture, the name 'Amielle Jenascia Jacinto Daep', and the student number 'Student No: 2026-00001'. Below this, the 'Personal Information' section contains four input fields: 'STUDENT NAME' (filled with 'Amielle Jenascia Jacinto Daep'), 'STUDENT NUMBER' (filled with '# 2026-00001'), 'COLLEGE' (filled with 'CA'), and 'PROGRAM / COURSE' (filled with 'BSA'). A 'Change Password' button is located at the bottom right of the form.

Changing your Password

The screenshot shows a 'Change Password' modal form overlaid on the account page. The modal has a title 'Change Password' and a subtitle 'Use this to update the password tied to your current account. Password recovery is not available here.' It contains three input fields: 'CURRENT PASSWORD', 'NEW PASSWORD', and 'CONFIRM NEW PASSWORD'. At the bottom, there are two buttons: 'Cancel' and 'Change Password'.

1. Click on the Change Password button.
2. Enter your current password and Enter a new password.
3. Confirm the new password.
4. Click on the Change Password button to confirm your changes.

Registrar Portal Features

Dashboard Page

The Dashboard provides a comprehensive overview of all document upload activities, combining high-level metrics with a detailed history log and robust upload controls.

Viewing System Status

1. Review the Summary Cards, which display the metrics across all uploads: Total, Active, Archived, Incomplete, and Errors
2. Scroll down to the history table to view upload statuses categorized by Office, College, and Program, along with their last updated timestamp.
3. To ensure you are viewing the most up-to-date data, click the **Refresh** button at the top right to pull the latest data.

Uploading and Saving Files

1. Drag and drop **.csv** files into the upload section, or click to select files.
2. If a specific file has missing or partial data, check the Mark as incomplete box next to its name.
3. Click **Confirm & Save** to process the files.
4. **Review Errors:** If any rows fail to upload, an Error report box will appear below the upload section, detailing exactly which file, row, and error occurred.

Registrar Page

This page manages the end-to-end workflow of student document requests.

All 1Requested 1Prepared 0Claimed 0Disposed 0

Q Search...

DOCUMENT / REQUEST	STUDENT	DATE REQUESTED	ACTION
Certificate of Enrollment REQ-20260515-1730	Amielle Jenascia Jacinto Daep 2026-00001	May 15, 05:56 AM	Mark Prepared

Tracking and Filtering Requests

1. Navigate to the Registrar page.
2. Use the status tabs at the top to filter the queue: All, Requested, Prepared, Claimed, and Disposed.
3. Use the search bar to find requests by student name, student number, document type, or request code.
4. Use the sort button to order the list by Name (A-Z/Z-A) or Date (Newest/Oldest).

Viewing Request Details & Progress

1. Click anywhere on a request row in the table.
2. A Request Details Modal will appear, showing the document code, student info, and any notes.
3. Review the visual **Progress Tracker**, which outlines exactly when the document was Requested, Prepared, Claimed, or Disposed.

Certificate of Enrollment
REQ-20260515-1730 **REQUESTED**

Student

Amielle Jenascia Jacinto Daep

Student No.

2026-00001

Notes

WAG NA WAG MONG SASABIHIN

PROGRESS TRACKER

○

Requested
Request submitted successfully.
5/15/2026, 5:56:17 AM

○

Prepared
Waiting for registrar preparation.

○

Claimed
Awaiting student claim.

○

Disposed
Removed from active queue.

Updating Request Statuses

1. Locate the request in the table. Depending on the current status, different action buttons will be available in the rightmost column:

- **Requested tab:** Click Mark Prepared.
- **Prepared tab:** Click the **Checkmark** icon to mark as Claimed, or the **X** icon to mark as Disposed.

2. **Adding Notes:** Whenever you update a status, a **Status Update Modal** will appear. You can type optional notes regarding the update and click **Confirm**, or simply click **Skip**.

FAQs and Context Page

This page is your centralized hub for managing the AI's knowledge base. It is divided into three main tabs: Questions, FAQ, and Context.

Switching Between Entry Types

Use the toggle buttons at the top to switch between FAQ, Context (longer categorical guidance), and Captured Questions.

Managing Captured Questions

(Question Tab) This tab tracks inquiries Haribot could not answer.

1. Click the Questions tab.
2. Use the search bar or the **Sort** icon (Newest, Oldest, Title A-Z, Z-A) to find specific pending questions.
3. Click the **Edit** icon on a question card to open it in the right panel.
4. In the **Answer and Publish** panel, select whether to save it as an FAQ or Context, set its visibility scope (e.g., General, Students), and type your answer.
5. Click **Confirm** to publish the answer and resolve the captured question.
6. Click the **Trash** icon on a question card to permanently delete it if it doesn't require an answer.

Accounts Page

This page allows you to view existing student profiles, manually edit login credentials, and perform bulk uploads specifically for ICTO accounts.

Viewing and Filtering Accounts

1. Navigate to the Student Accounts page.
2. Use the college filter pills at the top to narrow down the list by specific colleges.
3. Use the search bar to find a student by Name, Student Number, or Program.
4. Use the dropdown on the right to sort the list.

Bulk Uploading ICTO Accounts

1. Click the Upload CSV button.
2. Drag and drop your **.csv** file into the modal, ensuring it contains headers for student number and password.
3. Click Upload to process the file.

Offices Page

NSTP & OSD Page

The NSTP (National Service Training Program) and OSD (Office of Student Discipline) tabs serve as historical logs. These pages specifically display the historical CSV upload records routed through the central ETL pipeline that pertain to their respective offices.

Colleges Page

This section allows administrators or department heads to view historical data uploads filtered specifically for individual colleges and their respective programs.

Colleges of Accountancy, Nursing, and Technology

These pages act as specialized historical logs. They display actual CSV upload histories that were processed through the central registrar ETL pipeline.

Viewing College-Specific Uploads

1. Navigate to the Colleges dropdown and select your desired college.
2. The page will automatically display upload history pertaining to students, grades, curriculums, syllabi, and thesis data for that specific college.
3. You do not need to manually filter the data; the system automatically isolates the records based on the page you are viewing:
 - **College of Accountancy:** Automatically filtered to show only college code **CA** and the **BSA** program.
 - **College of Nursing:** Automatically filtered to show only college code **CN** and the **BSN** program.
 - **College of Technology:** Automatically filtered to show only college code **CT** and the **BSCS** and **BSIT** programs.

Document Request Tracking

The request lifecycle is **Pending**, **Prepared**, **Claimed**, and **Disposed**. Students can monitor their own request status from the dashboard, but official document release still follows on-site registrar processing.

CSV Upload Guidance

Upload Type	Required Header Shape	Behavior
FAQ / Context CSV	scopeType, category, title, answer or context-like fields	The parser uses the header row as the main reference and imports published helpdesk content.
ICTO Account CSV	student number and password	The upload updates only existing student records and rejects missing student numbers.

CSV Format

College Masterlist.csv

Includes the Year, Block, Last Name, First Name, Middle Name, Student Number, and Status (Regular or Irregular).

Year	Block	Last Name	First Name	Middle Name	Student Number	Status
1	1	Dela Cruz	Juan	Doe	2023-23001	Regular

College Curriculum.csv

Includes the Grade Level, Term (Semester), Units, Subject Code, Title.

Level	Term	Units	Code	Title
3	2	3	CSC 0313	CS Elective

College Syllabus.csv

Includes the Subject Code, Title, and Description.

Code	Title	Description
CSC 0313	CS Elective	This course tailors to current industry trends or specific domains within computer science.

College Grades.csv

Includes the Students Name, Students Number, and Grade per Subject Code.

Name	Student Number	Grade
Manon D. Bannerman	2023-00002	1.00

CSV Format

College Thesis.csv

Includes the Students Number, Students Name, and Status of their Thesis (OK or INC).

Student Number	Name	Status
2023-00002	Manon D. Bannerman	OK

NSTP Service Status.csv

Includes the Students Number, Students Name, and NSTP Service Status (OK or INC).

Student Number	Student Name	Status
2023-00001	Juan D. Dela Cruz	INC

Admissions Office Requirements Status.csv

Includes the Students Number, Students Name, Status of their Birth Certificate and FI37 (OK or INC).

Student Number	Student Name	BC_Status	FI_Status
2023-00001	Juan D. Dela Cruz	INC	OK

ICTO Credentials.csv

Includes the Students Number, Students Name, and their default password.

Student Number	Student Name	Password
2023-00001	Juan D. Dela Cruz	password123

CSV Format

OSD Record Status.csv

Includes the Students Number, Students Name, and Status of their Record (No Record, Minor Offense, OR Major Offense).

Student Number	Name	Status
2023-00002	Manon D. Bannerman	No Record

OUR Offices.csv

Includes the Departments ID, Departments Name, and its abbreviated name.

Dept ID	Name	Name Abbr
1	Office of the University Registrar	OUR

Troubleshooting

- If you cannot sign in, verify the student number and password on the account.
- If a password change fails, confirm the current password and new password length.
- If a document request is missing, confirm that the student number exists in the database.
- If a CSV row fails, review the header names and required fields.
- If you are a guest, account-specific information will not be available until you sign in.

Installation Guide

This guide outlines the steps required to install, configure, and launch the HariKnows AI-integrated registrar helpdesk.

Prerequisites

- Node.js & npm** For frontend package management and execution.
- .NET SDK** Required to run the backend and manage environment secrets.
- SQLite** The system relies on a local SQLite database (hariknows.db).

Initial Setup

Install Dependencies

Open your terminal, navigate to the project's root directory, and run the automated setup script to install all necessary packages:

```
npm run setup
```

Environment Configuration

HariKnows utilizes the Gemini API for its core AI helpdesk features. The backend securely reads this API key (**Create your own**) from your local configuration via .NET User Secrets.

1. Navigate to the Backend Directory

```
cd backend/HariKnowsBackend
```

2. Initialize User Secrets

```
dotnet user-secrets init
```

3. Configure the Gemini API Key

```
dotnet user-secrets set "GeminiApi:ApiKey" "<GEMINI_API_KEY>"
```

4. Launching the Application

```
npm run dev
```

Installation Guide

Registrar APIs Reference

For system integration, testing, or troubleshooting, the backend exposes the following primary endpoints for registrar catalog and document workflow management:

GET /api/registrar/state

Retrieves the current state of departments, workflow documents, activity logs, and the general catalog.

GET /api/registrar/catalog

Returns the complete catalog hierarchy (Colleges > Grouped Programs > Departments).

POST /api/registrar/departments

Provisions a new department within the system.

POST /api/registrar/documents

Initiates a new registrar workflow document.

POST /api/registrar/documents/{documentId}/move

Transfers an existing workflow document to a different department.
